

MILL BROOK HYDRAULIC AND EROSION& SCOUR CONTROL
Windsor, CT
E2024-07

ADDENDUM NO. 1
December 13, 2024

OPENING EXTENDED:

Qualification packages and proposals will be received until **2:00 P.M. on THURSDAY, JANUARY 9, 2025**. Bids shall be delivered to Windsor Town Hall, 275 Broad St, Windsor CT, 06095, 3rd Floor, Engineering Department.

QUESTIONS FROM BIDDERS AND CORRESPONDING ANSWERS:

Question 1: What public outreach has been done to guide the concept design phase and what feedback did the steering committee or other interested stakeholders provide on these concepts?

The concept design phase was focused on mitigation of erosion. Public outreach was not conducted in this project phase.

Question 2: We would typically explore floodplain reclamation and riparian corridor widening when the space allows, and the property management goals include such habitat restoration priorities. Was this evaluated during the concept phase, and, if so, what were the constraints that made that impractical?

No. The intent of the project is to reduce current effects of erosion.

Question 3: Is this RFP specifically looking for the selected consultant to advance the design as depicted by Weston & Sampson or is there interest in reimagining the methodologies that are employed?

Yes, but a respondent may choose to submit alternatives.
