PUT A FREEZE ON WINTER FIRES

Did you know that January is our busiest month for fire department calls for service? The largest percent of which are car accidents and cooking fires. The good news is that many fires and other emergencies are preventable. Common sense actions like driving at lower speeds during winter weather, staying in the kitchen while you cook, and using heating equipment safely can keep you and your family safe this winter.

EMERGENCY PREPAREDNESS TIP OF THE SEASON

Clearing snow and ice after a storm may feel like a chore but it is one of the most important things you can do to keep you and your family safe. Be sure to clear a path from all of your doors and exits, as well as your driveway and sidewalks. Clear snow away from any vents from your home to prevent deadly carbon monoxide poisoning. And help your local firefighters out by clearing snow away from any nearby hydrants.
