(Inspection information applicable to facilities subject to the asbestos NESHAP, 40 C.F.R., Part 61)

In accordance with Section 61.145 of the U.S. Environmental Protection Agency's National Emission Standards for Hazardous Air Pollutants (NESHAPs) regulation, the owner or operator of a facility\* shall, prior to the commencement of renovation or demolition, inspect the affected portions of the facility for asbestos, including Category I and Category II non-friable asbestos.

The submission of the Notification of Demolition Form is not required provided that an Asbestos Abatement Notification Form was previously submitted to the Department of Public Health involving abatement related to the demolition of the facility. In that case, the Asbestos Abatement Notification Form submitted to the agency satisfies the notification requirement for demolition of the facility. In all cases of demolition, one and only one form (Notification of Demolition Form or Asbestos Abatement Notification Form, as applicable) shall be sufficient to satisfy the Department of Public Health notification requirements detailed in Section 19a-332a-3 of the RCSA.
