4:00 PM to 7:00 PM | No Appointment Needed | Ages 6 months +

The CDC has revised their guidance and updated (bivalent) COVID-19 vaccines will replace the original (monovalent) COVID-19 vaccine. Most individuals who have received an updated booster vaccine are not yet eligible to receive another booster. However, persons 65yo+ may receive a second updated booster 4 months after their first updated booster and persons who are immunocompromised may also receive additional updated boosters. Children (6 months – 5years) who are unvaccinated will receive updated vaccines. Children who have received 1, 2 or 3 vaccines of the original COVID-19 vaccine are eligible to receive an updated vaccine(s). This clinic is a walk-in clinic and recipients should bring their vaccine & insurance cards and ID!
